PROFILE

Results-driven **Mobile App Developer** with 2+ years of experience building **cross-platform applications** using Flutter. Skilled in **clean architecture**, advanced state management (BLoC, Riverpod), and native Android plugin development with Kotlin. Proven track record delivering **ERP-integrated enterprise apps**, real-time **location tracking**, and **offline-first synchronization** for large-scale workflows. Adept at designing intuitive and responsive **UI/UX interfaces**, translating complex requirements into polished, user-friendly screens. Strong collaborator in **Agile teams**, ensuring scalable, secure, and high-quality solutions.

EXPERIENCE

Mobile App Developer

Feb 2025 – Present

SpiralCode Innovates LLP, Kochi, Kerala

- Spearheaded the UI/UX design process, conducting user research and translating requirements into intuitive wireframes and high-fidelity mockups to enhance user experience.
- Architected and delivered an **enterprise-grade Flutter ERP application** with attendance, multichannel sales, custom reporting, and photo-verified time tracking.
- Engineered a **real-time background location tracking module** using Kotlin plugins, Room DB, and Kalman filtering, reducing GPS drift by **30%** and enabling accurate route optimization.
- Orchestrated complex **state management** with BLoC and Riverpod, applying caching for faster retrieval and integrating secure REST APIs (Dio) for ERPNext synchronization.
- Implemented robust **offline-first support** using Hive caching and intelligent sync queues, ensuring seamless app usage in low-network environments.
- Improved app stability with the **Firebase ecosystem** (Crashlytics, Remote Config, App Distribution) and **Sentry logging**, reducing production crashes by **60%** and enhancing debugging efficiency.
- Managed **Google Play Store releases**, including signing, versioning, closed testing, and rollout strategy, ensuring smooth deployment and compliance with Play policies.

Junior Android Developer

Nov 2022 – Aug 2023

Nizzcorp, Malappuram, Kerala

- Built an employee management app using Flutter and Firebase, enabling real-time workforce tracking.
- Developed a sales management system with React JS, Node.js, and PostgreSQL, supporting **5k+ transactions weekly**.
- Assisted in deployments, QA testing, and production issue resolution, reducing bug resolution time by **20%**.

SKILLS

Languages: Dart, Kotlin, SQL, JavaScript, TypeScript

Frameworks: Flutter, Jetpack Compose, Dio, React, Next.js

Architecture: Clean Architecture, BLoC, Riverpod, MVVM

Design & Workflow Tools: Figma, XMind

Cloud & Backend: Firebase (Crashlytics, Remote Config, Firestore, Auth), REST APIs

Databases: Hive, SQLite, PostgreSQL, SharedPreferences, Secure Storage

Tools & DevOps: Git, GitHub, Postman, Android Studio, VS Code, Docker, CI/CD (GitHub Actions)

PROJECT

Location Tracker Plugin (Flutter + Kotlin)

Custom Flutter plugin for accurate background location tracking with native Android integration.

- Built a Kotlin foreground service with Room DB and Kalman filter, reducing GPS drift by **30%** and improving distance accuracy.
- Implemented FIFO-based history management and integrated Firebase error logging for reliability.
- Designed for ERP-integrated field workflows, ensuring accurate distance-based reporting for enterprise apps.

EDUCATION

Bachelor of Computer Applications (BCA)

2019 – 2022

Jaipur National University
