

Shuhaib KT

Flutter Developer

shuhaibkt02@gmail.com | +91 6282271405 | Kerala, India | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience building cross-platform mobile applications in ERP, logistics, and hyperlocal marketplaces using **Clean Architecture, BLoC, and Riverpod**. Skilled in offline-first architecture, native Android integration, real-time location tracking, Firebase, and Google Maps; also experienced with responsive web development using React.js and Next.js.

SKILLS

Languages: Dart, Kotlin, JavaScript, TypeScript, SQL

Mobile Development: Flutter, Android SDK, MethodChannel, BLoC, Riverpod, Clean Architecture, Background Services, Geofencing, MVVM, Location Tracking, Google Maps

Databases & Storage: PostgreSQL, MongoDB, SQLite, Hive

Cloud & Third-Party Services: Google Maps Platform, Razorpay, Sentry, AWS, Firebase (FCM, Push Notifications, Crashlytics, Analytics, Remote Config, App Distribution)

Networking & Backend: Node.js, Express.js, REST APIs, JSON

Web Technologies: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Web Performance: Server-Side Rendering (SSR), SEO, Core Web Vitals, Code Splitting, Lazy Loading

Testing: Flutter Widget Testing, Unit Testing

Tools & Platforms: Git, GitHub, GitHub Actions, Fastlane, Postman, Android Studio, Google Play Console, Figma

Methodologies: Agile/Scrum, CI/CD

PROFESSIONAL EXPERIENCE

Frontend Developer, Cake Nook

Jan 2026 - Jun 2026

- Developed responsive customer-facing interfaces for a multi-vendor hyperlocal marketplace using Next.js, React.js, TypeScript, and Tailwind CSS, supporting **desktop, tablet, and mobile**
- Implemented the complete purchase flow including product browsing, cart, checkout, order placement, and **client-side authentication**
- Integrated **Razorpay** for secure online payments, enabling a smooth end-to-end checkout experience
- Implemented geo-boundary validation using Google Maps Platform to **verify delivery eligibility** across multiple vendor service zones
- Optimized Core Web Vitals through Server-Side Rendering (SSR), image optimization, lazy loading, code splitting, and **caching strategies**, improving SEO and page performance

- Delivered **6 production Flutter applications** for enterprise clients, utilizing BLoC for long-term architectures and Riverpod for rapid MVP development
- Designed Flutter applications following Clean Architecture and implemented an **offline-first architecture** using Hive with background synchronization for reliable field operations in low-connectivity environments
- Implemented native Android integrations using Kotlin, MethodChannels, and foreground/background location services to support **continuous field tracking**
- Integrated RESTful APIs, Firebase (FCM, Crashlytics, Analytics, Remote Config), Google Maps Platform, Ola Maps, and Sentry to enable **real-time communication**, monitoring, and location-based features
- Automated build and release pipelines using GitHub Actions, Fastlane, and Google Play Console, **streamlining application deployment**
- Developed Flutter Widget Tests for critical UI components, improving **application reliability** and maintainability
- Collaborated with UI/UX designers and backend developers in Agile Scrum teams to deliver **production-ready mobile applications**

Junior Software Developer, Nizzcorp

Nov 2022 - Oct 2023

- Developed a **Flutter-based employee management application** with automated task assignment based on employee schedules and working hours
- Delivered a field sales management application using React.js, Node.js, MongoDB, and PostgreSQL for **order management, billing, and sales reporting**, integrating RESTful APIs across frontend and backend services
- Engineered a **drag-and-drop ERP page builder** using HTML, CSS, and JavaScript, enabling non-technical users to visually assemble ERP pages without developer assistance
- Implemented reusable UI components and developed an **SVG-based component serialization system** with JSON persistence for efficient storage and rendering
- Collaborated with the development team on **feature development, bug fixes, API integration, and production application maintenance**

PROJECTS

Location Tracker Plugin (Flutter + Kotlin) · Flutter, Kotlin, Android, Room DB, MethodChannel https://github.com/shuhaibkt02/location_tracker

- Developed a reusable Flutter plugin for persistent background location tracking, used across multiple ERP field applications, implementing Android foreground services, Kotlin MethodChannels, and Room DB.
- Improved GPS tracking accuracy using Kalman filtering and implemented FIFO-based location history management to optimize storage while retaining recent field operation data.

Personal Portfolio · Next.js, React.js, Tailwind CSS

<https://shuhaibkt.vercel.app/>

- Developed a responsive portfolio website (Next.js, React.js, Tailwind CSS) showcasing projects, technical skills, and professional experience with a mobile-first design.

EDUCATION

Bachelor of Computer Applications, Computer Applications, Jaipur National University

Jan 2019 - Jan 2022
