PROFESSIONAL SUMMARY

Mobile App Developer with 2+ years building cross-platform Flutter applications using BLoC, Riverpod, and native Android plugins. Specialized in offline-first ERP solutions, real-time location tracking, and Firebase integration. Experienced in architecting complete systems from frontend to backend before writing code.

EDUCATION

Bachelor of Computer Applications (BCA) 2019 – 2022
Jaipur National University

CORE SKILLS

- **Languages:** Dart, Kotlin, SQL, JavaScript, TypeScript
- **Frameworks & Libraries:** Flutter, Jetpack Compose, Dio, React, Next.js
- **Architecture & State Management:** Clean Architecture, BLoC, Riverpod, MVVM
- **Cloud & Backend:** Firebase (Crashlytics, Remote Config, Firestore, Auth), REST APIs
- **Databases:** Hive, SQLite, PostgreSQL, Room DB, SharedPreferences, Secure Storage
- **Tools & DevOps:** Git, GitHub, Postman, Android Studio, VS Code, Docker, CI/CD (GitHub Actions)
- **Design Tools:** Figma, XMind
- **Soft Skills:** Agile Development, Cross-functional Collaboration, Problem Solving, Technical Documentation

PROFESSIONAL EXPERIENCE

Mobile App Developer Feb 2025 – Dec 2025
SpiralCode Innovates LLP, Kochi, Kerala

- Architected and delivered an enterprise-grade Flutter ERP application with attendance tracking, multichannel sales, custom reporting, and photo-verified time tracking features.
- Engineered a real-time background location tracking module using Kotlin plugins, Room DB, and a Kalman filtering algorithm, significantly improving GPS accuracy and enabling precise route optimization for field teams.
- Implemented robust state management with BLoC and Riverpod patterns, applying intelligent caching strategies and integrating secure REST APIs (Dio) for ERPNext synchronization.
- Developed offline-first architecture using Hive local storage and intelligent sync queues, ensuring seamless app functionality even in low-network environments.
- Dramatically improved app stability through Firebase ecosystem integration (Crashlytics, Remote Config, App Distribution) and Sentry error logging, making debugging and issue resolution much more efficient.
- Managed complete Google Play Store release cycle, including app signing, versioning, closed beta testing, and staged rollout strategy, ensuring compliance with Play Store policies.
- Collaborated with UI/UX designers to translate wireframes and mockups into responsive, user-friendly mobile interfaces that enhanced overall user experience.

Junior Android Developer Nov 2022 – Aug 2023
Nizzcorp, Malappuram, Kerala

- Developed an employee management application using Flutter and Firebase, enabling real-time workforce tracking and attendance monitoring.
- Built a sales management system with React JS, Node.js, and PostgreSQL backend that handled high transaction volumes reliably.
- Improved bug resolution time through systematic QA testing, production monitoring, and rapid deployment of hotfixes.

PROJECTS

Location Tracker Plugin (Flutter + Kotlin)

github.com/shuhaibkt02/location_tracker

Custom Flutter plugin for accurate background location tracking with native Android integration

- Built Kotlin foreground service with Room DB persistence and Kalman filtering algorithm to substantially reduce GPS drift and improve distance calculation accuracy.
- Implemented FIFO-based location history management and integrated Firebase error logging for reliable plugin performance.
- Designed specifically for ERP field workflows enabling accurate distance-based reporting and route tracking for enterprise applications.

Personal Portfolio Website

shuhaibkt.vercel.app

Modern, responsive portfolio built with Next.js showcasing projects and professional experience

- Developed fully responsive portfolio using Next.js, React, and Tailwind CSS with optimized performance and SEO.
- Implemented dynamic project showcase with filtering, smooth animations, and mobile-first design approach.

ACHIEVEMENTS & LEADERSHIP

- Designed complete system architecture for production applications, planning both frontend and backend solutions before implementation to ensure scalable and maintainable code.
- Successfully published production-grade Flutter applications to Google Play Store, managing the entire release process from development to deployment.
- Mentored junior developers and aspiring developers on Flutter best practices, clean architecture patterns, and effective state management strategies.
- Solved complex technical challenges in real-time location tracking, developing innovative solutions for enterprise field workforce management applications.
